

BEARON AQUATICS

ICE EATERS | OLYMPUS FOUNTAINS | POWER HOUSE AERATION

AERATION vs FOUNTAIN

Power House Aeration

- Our customer friendly, energy efficient Power House Aerators are custom designed to agitate high volumes of water at the surface to maximize exposure of water to the air for ultimate performance
- High pumping volume degasses the water of nitrogen, carbon dioxide, and hydrogen sulfide while raising dissolved oxygen levels
- Excellent Shallow Water Operations
- Prevents Fish Stress, Mortality and Increases Fish Production
- Helps Prevent Algae Growth
- Water Circulation with Little to No Bottom Turbulence
- Minimizes anaerobic zones in bottom water and bottom sediment surface
- Average Oxygen Transfer Rate up to 2.956 Lb. O₂/HR
- Power House Aeration can easily be enhanced by our accent lighting. With our quick disconnect system, lighting accents can be added at any time
- Aeration is one of the most widely used tools for maintaining aquatic systems: wastewater treatment, improvement of number and health in fisheries, mosquito control, reduction of nutrient loading, sediment management, water clarity, and algae control

Olympus Fountains

- Our customer friendly, energy efficient Olympus Fountains are custom designed to adapt to multiple spray patterns and can operate in as little as 14" to 18" of water
- Adds beauty and elegance to any pond or lake
- Uses less horsepower and lower amperage than our competitors without giving up height
- Shoot up 5 - 21 feet into the air depending on the model and spray pattern
- Focal point in most ponds
- Golf courses, parks, office buildings, privately owned ponds and housing developments/HOA are all common places you see fountains used
- Fountains float on the surface, the circulation does not reach all the way to the bottom in applications deeper than 6 feet to 8 feet deep
- Olympus Fountains can easily be enhanced by our accent lighting. With our quick disconnect system, lighting accents can be added at any time

Bearon Aquatics is a branch of Bearon Manufacturing, LLC. | Listing No. E112360 Complies with UL 778 And CSA C22.2 No. 108

PROP 65 WARNING: Crude oil, gasoline, diesel fuel and other petroleum products can expose you to chemicals including toluene and benzene, which are known to the State of California to cause cancer and birth defects or other reproductive harm. These exposures can occur in and around oil fields, refineries, chemical plants, transport and storage operations such as pipelines, marine terminals, tank trucks and other facilities & equipment.
